All prices and specifications subject to change without notice.

Why is it so comfortable?

- Large padded seat, good back support and wide range of seat adjustment
- Comfortable, upright seating position allows great visibility
- No strain on hands, wrists, neck or shoulders

Why is our suspension better than the competition?

- 10 years of suspension design experience means optimized pivot location and shock settings to eliminate pedal-induced bob
- Proprietary HeadShok suspension system provides 60mm of plush travel on a 16" wheel

Why did we choose Mid Wheel Base - MWB?

- Easy to ride - low center of gravity allows easy start and stop
- Low step over height for getting on and off easily
- Same overall length as a normal bike for easy storage
- Good maneuverability
- Good ergonomics
- 2 sizes fit everyone

Why full suspension?

- Helps maintain rider stability
- Smaller wheels roll over bumps better with suspension
- Reduces road vibration and fatigue
